VOCE

Overview

How can you reconstruct an artwork's documented history?

A provenance dossier makes the chain of information inspectable. Different documents answer different questions about a work.

01 Gather the documents

Collect dated records of ownership, exhibitions, publications and transfers.

02 Reconstruct the sequence

Place the documents in time and identify their origin.

03 Expose the gaps

Keep uncertain attribution, missing periods and conflicting records visible.

04 Seek specialist verification

Refer questions of authenticity, condition, title and export status to the relevant specialists.

A documented provenance does not by itself certify authenticity or establish every legal question. VOCE organises the dossier and does not issue authenticity certificates.
