Overview

How does the VOCE Guide help you find an answer?

The Guide searches the VOCE corpus from a question in your own words. Its answer points to supporting documents and relevant pathways in the site.

01 **Ask a question**

Describe the subject or the problem you want to examine.

02 **Search the corpus**

The Guide finds relevant VOCE documents.

03 **Read with references**

The answer links to the documents and suggested pathways.

04 **Check the support**

Open the documents, review their scope and decide whether they answer your question.

When the corpus cannot support an answer sufficiently, the Guide should say so. A suggested pathway helps navigation; it does not establish that every claim is proven.
